Rainbow Portal Conceptual Migration of .NET Code to Web Server Environments (Changes View)

- Developer will monitor the Rainbow Portal .NET Web site for changes. This will be done weekly.
- 2 Developer will back up the local copy of Rainbow Portal.
- 3 Developer will copy down any changes from the Rainbow Portal .NET web site.
- 4 Developer will incorporate the changes into the local copy of Rainbow Portal and test the changes according to the Rainbow Portal Test Plan.
- **5** Developer will move the changes to Visual Sourcesafe.
- **6** Developer will back up the Rainbow Portal code on the development web server. (6a) Developer will back up the Rainbow development database.
- 7 Developer will move the changes from Visual Sourcesafe to the development web server. Note: Manually copying the code eliminates the need for another copy of the Application Server and eliminates the need for Quality Assurance to copy the code.
- 8 Developer will test the Rainbow Portal on the development web server.
 - = Currently does not exist

6a

Microsoft SQL Server 2000 (Development DB)
